

BusinessLynk – Dedicated ISDN

CyberLynk Business Internet Services

BusinessLynk is CyberLynk's Full-time ISDN Internet package designed especially for our business customers.

The BusinessLynk package is designed to give you all the Internet services that a small business needs at a reasonable price.

Your business needs a full time Internet connection during normal business hours, but who wants to pay for that connection when it goes unused every night? For half the price, you can enjoy the benefits and extras most Internet Service Providers usually reserve for customers who pay for a dedicated connection.

It's the perfect solution for the small business that needs a high-speed Internet connection without the high price.

Our BusinessLynk package includes some of our most popular services uniquely bundled together to save you money. Most Internet Service Providers charge a separate fee for each of these services. We have put the BusinessLynk package together to give our customers the most popular and powerful features at the best price.

Compare our BusinessLynk program to the average competitor's individual prices. We think you'll agree that BusinessLynk gives you more for your money.

The BusinessLynk package includes all that you need to be successful right from the start. It also offers features that allow your Internet presence to grow.

A full-time ISDN connection - No time-outs or disconnects.

Web Hosting - Enjoy Basic, worry-free web hosting with features described here.

Unlimited E-Mail Boxes - You may set up as many e-mail boxes as you need. We also provide you with complete web-based administrative access so you can make changes and add boxes immediately.

Two 56K dial up accounts - This gives you the ability to dial in from home, the road or even the office to avoid additional ISDN connection charges.

There are many other services that CyberLynk includes.
